

The December close

Harbour & Co. Supply

Financial year 2025 | Seed 271828 | Source evidence book

Your role

Take over the books of a fictional trading and installation business. January to November are the agreed historical ledger. December contains unprocessed invoices and missing closing entries. Use this evidence to complete bookkeeping, reconcile the balances, prepare estimates and taxes, and explain the final financial statements.

How to work through the case

1. Read the opening policies and unadjusted trial balance CSV.
2. Process invoices using the correct accounts, dates, contacts and GST treatment.
3. Reconcile bank, receivables, suppliers, payroll, assets and inventory.
4. Prepare the accruals, prepayments, provisions, leases and tax adjustments.
5. Tie the statements together and write evidence-backed workpaper conclusions.

All people, entities, invoices and bank details are fictional. This pack is not valid for payment, employment records, tax lodgement or statutory filing. The app and CSV exports hold the practice ledger; this book contains source evidence.

The case uses simplified withholding rates and specified tax assumptions. Full payroll legislation, foreign currency ledgers, consolidation and complete statutory disclosures are not modelled.

TB-OPEN | Opening balances and accounting policies

Harbour & Co. | Issued 2024-12-31

Supporting information

All opening balances have been agreed. The 2024 income statement is not supplied. The financial position comparative is 31 December 2024.

All documents, people, bank details and entities in this case are fictional. Currency: AUD. Calendar year-end: 31 December 2025.

The business uses accrual accounting, a perpetual inventory system with fixed unit costs, monthly GST reporting and a monthly full-charge depreciation convention from availability for use.

Interest paid is classified as financing; interest received as investing. Income tax payments are operating cash flows.

The exercise tax rate is 25%. PAYG withholding uses stated training percentages, not statutory withholding tables. No payroll tax, workers compensation or tax offsets are modelled.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

LEGAL-LETTER | Legal claims assessment

Example Legal Partners | Issued 2025-12-29

Supporting information

A customer claim arises from a pre-year-end breach. Counsel considers a loss 70% likely. The single most likely settlement is 18000; other outcomes do not change the best estimate. Payment is expected within six months.

A separate threatened claim has only a 20% probability of an outflow of \$40,000. It is possible, not remote, with no present payable. Disclose it as a contingent liability; do not recognise a provision for it.

Future refurbishment planned by management costs \$25,000. No contract or constructive obligation exists. No provision or contingent liability is recognised solely for this future plan.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

ACCRUAL-MEMO | Unrecorded December expenses

Finance team | Issued 2025-12-31

Supporting information

The January invoice review identified December electricity of \$940 excluding GST and December accounting work of \$3,500 excluding GST.

Both services were received before year-end. No tax invoice was held at year-end; the case records input GST when the invoices arrive.

Prepare an accrual of \$4,440. Clear or reverse it when the January invoices are recorded.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

ECL-MEMO | Receivables loss-rate matrix

Credit controller | Issued 2025-12-31

Supporting information

Apply the following lifetime expected loss assumptions to open invoice balances, based on days past due: not yet due 1%; 1-30 days 3%; 31-60 days 10%; 61-90 days 35%; over 90 days 80%.

Round the allowance for each aging bucket to cents. The \$1,800 on-account customer credit is shown separately and does not reduce the loss-rate matrix for unidentified invoices.

These are supplied forward-looking case assumptions. They are not standard-mandated rates. Opening ECL allowance is \$3,000.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

FA-REGISTER | Fixed asset register and depreciation policy

Finance team | Issued 2025-12-31

Supporting information

FA-001 Warehouse racking: cost 48000; residual 3000; life 120 months; available 2023-01-01; opening accumulated depreciation 9000.

FA-002 Delivery vehicle: cost 60000; residual 12000; life 60 months; available 2023-01-01; opening accumulated depreciation 19200.

FA-003 Office equipment: cost 18000; residual 0; life 36 months; available 2024-01-01; opening accumulated depreciation 6000.

FA-004 Electric pallet stacker: cost 27000; residual 2000; life 60 months; available 2025-12-16; opening accumulated depreciation 0.

Straight-line method; charge a full month from the month available for use. Round each asset monthly to the nearest cent. No disposals or impairment in this case.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

GST-2025-12 | Monthly GST reconciliation

Finance team | Issued 2025-12-31

Supporting information

The fictional company reports monthly. Taxable supplies use 10% GST; input tax credits are taken only on supported taxable purchases. No GST is charged on wages, interest, depreciation or provision entries.

Reconcile December output and input control balances, transfer them to the settlement account, and leave the December net payable unpaid at year-end.

This worksheet teaches ledger-to-return reconciliation. It does not submit a BAS or validate actual GST attribution eligibility.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

LEAVE-REPORT | Annual leave entitlement valuation

People team | Issued 2025-12-31

Description	Qty	Unit amount	Net amount	GST
Morgan Lee: unused leave hours x ordinary hourly rate	116	41.83	4,852.28	0.00
Alex Taylor: unused leave hours x ordinary hourly rate	92	35.23	3,241.16	0.00
Sam Patel: unused leave hours x ordinary hourly rate	104	31.58	3,284.32	0.00
Jamie Brooks: unused leave hours x ordinary hourly rate	76	27.94	2,123.44	0.00
Riley Chen: unused leave hours x ordinary hourly rate	64	24.90	1,593.60	0.00
Jordan Ellis: unused leave hours x ordinary hourly rate	88	26.72	2,351.36	0.00
Summary			AUD	
Net amount			\$17,446.16	
GST			\$0.00	
TOTAL			\$17,446.16	

Supporting information

The supplied hours are the final unused entitlements after all leave taken. Multiply by current ordinary hourly rates. The opening provision was \$14,000 and no separate provision entries were posted during the year.

This exercise excludes on-costs and discounting. A real employee benefit valuation must assess both. Do not add payroll withholding or GST to the provision.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

REMIT-DEC31 | 31 December deposit in transit

Northline Works | Issued 2025-12-31

Supporting information

A \$1,800 customer remittance was deposited before cut-off and is recorded in the cash book. The bank credits it on 2 January.

Allocate this receipt as an on-account customer credit until remittance details are available. It is a valid deposit in transit. Do not post it again.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

TAX-MEMO | Current and deferred tax training bridge

Tax adviser - case assumptions | Issued 2025-12-31

Supporting information

Assume a 25% tax rate and sufficient probable future taxable profit to support the deferred tax asset. These are exercise inputs, not a tax eligibility conclusion.

Taxable profit: accounting profit before tax + annual ECL allowance movement + warranty closing less opening \$6,000 + legal provision movement + leave provision movement + NRV allowance movement - additional tax depreciation of \$6,000. No permanent differences in this case.

Year-end deductible temporary differences: full ECL allowance, warranty provision, legal provision, leave provision and NRV allowance. Tax base of each related liability/allowance is zero under the supplied assumptions. DTA opening balance \$2,000.

Equipment taxable temporary difference at year-end: \$10,000. DTL opening balance \$1,000. The case includes an opening recognition catch-up in the deferred-tax movement, so the total tax expense need not equal exactly 25% of accounting profit.

Opening current tax payable \$4,000 was paid in January. Three \$3,000 current-year instalments were paid. Credit current tax payable for the current-year tax expense, without expensing the cash payments again.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

UNBILLED-MEMO | Completed unbilled work

Operations manager | Issued 2025-12-31

Supporting information

A separate completed installation worth 4200 excluding GST was accepted on 30 December. Billing occurs on 5 January 2026.

Recognise accrued revenue at year-end. In this case the GST attribution trigger occurs with the January invoice, so do not recognise GST in December. Reverse the accrual when billing is posted.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

WARRANTY-REPORT | Warranty claims and expected future outflows

Quality manager | Issued 2025-12-31

Supporting information

Opening provision was \$6,000. Claims settled were \$400 in each of 12 months, already debited to the provision. A portfolio assessment of products sold before year-end estimates remaining expected claim costs of 6200.

The products carry an assurance warranty. A present obligation exists from past sales, an outflow for the portfolio is probable, and the estimate is reliable.

The estimate is the required closing provision, not an additional expense. No reimbursement asset or discounting is needed for this short-term case.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

LOAN-AGREEMENT | Term loan agreement and repayment terms

Practice Bank | Issued 2025-01-01

Supporting information

Opening loan: \$80,000, split \$24,000 current / \$56,000 non-current. Principal payments: \$2,000 monthly. Interest: 0.5% of opening monthly principal, paid with each instalment.

All twelve instalments are already recorded. No covenant breach or callable-on-demand term exists. The next twelve months principal is \$24,000.

Reclassify principal without changing total debt or cash. Interest paid is financing under the selected case policy.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

INS-2025 | Annual insurance policy

Anchor Insurance | Issued 2025-01-02

Description	Qty	Unit amount	Net amount	GST
Annual insurance policy	1	12,000.00	12,000.00	1,200.00

Summary	AUD
Net amount	\$12,000.00
GST	\$1,200.00
TOTAL	\$13,200.00

Supporting information

Coverage: 1 January-31 December 2025. Net premium \$12,000, GST \$1,200.

Paid on invoice date. Allocate the net cost evenly over 12 months.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

LEASE-2025 | 36-month equipment lease

Example Equipment Leasing | Issued 2025-07-01

Supporting information

Commencement: 1 July 2025. 36 end-of-month payments of \$2,000. Monthly discount rate: 0.5%. Initial present value: 65742.03.

No initial direct costs, incentives, residual guarantee, purchase option or GST in this isolated case. ROU asset equals initial liability. Depreciate over 36 months.

The first five monthly instalments and depreciation charges are already recorded. December opening liability: 57301.6 (use the amortisation schedule for exact amounts).

Classify principal due within the next twelve months as current. Interest paid is a financing cash flow under the case policy.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

SUB-2025 | Annual software subscription

Cloudstack Software | Issued 2025-07-01

Description	Qty	Unit amount	Net amount	GST
Annual software subscription	1	6,000.00	6,000.00	600.00

Summary	AUD
Net amount	\$6,000.00
GST	\$600.00
TOTAL	\$6,600.00

Supporting information

Coverage: 1 July 2025-30 June 2026. Net subscription \$6,000, GST \$600.

Paid on invoice date. Allocate the net cost evenly over 12 months.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

CONTRACT-DEC | Installation contract: customer advance and milestone

Beacon Interiors | Issued 2025-12-06

Supporting information

A \$16,500 cash advance was received on 6 December, including \$1,500 GST already accounted for. The advance is recorded as a contract liability.

The contract contains distinct accepted installation stages. By 31 December, an accepted stage worth \$6,000 excluding GST is complete. The balance is due to be performed in January.

Release only the accepted milestone amount. Do not recognise the full advance as revenue.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

SI-2024-118 | Opening overdue customer invoice

Westbrook Projects | Issued 2024-11-15 | Due 2024-12-15

Description	Qty	Unit amount	Net amount	GST
Opening carried-forward invoice balance (including GST previously accounted for)	1	12,000.00	12,000.00	0.00

Summary	AUD
Net amount	\$12,000.00
GST	\$0.00
TOTAL	\$12,000.00

Supporting information

Carried in opening receivables. Do not post again. No payment has been received during 2025. Opening ECL allowance: \$3,000.

Source figures stay fixed while your practice ledger changes. Keep the original reference when recording the transaction.

SI-12-001 | Invoice SI-12-001

Northline Works | Issued 2025-12-02 | Due 2026-01-01
